The Research Sweep, The Merit Gate

How the free research sweep checks rivals, customer words, gaps, market size and the rules, and how a person decides at the Merit gate whether the idea is worth building.

The Research Sweep

M02-L1 · About 6 Minutes

You can list the parts of the research sweep and explain why customers' own words come before our own ideas.

The Research Sweep

M02-L1

Esme Expected Charts, Owners Wanted Logs

Esme's neighbour runs Hollin Lane Kennels, a boarding kennel.

The Research Sweep

M02-L1

First, Check What We Already Own

Once an idea passes Screen, it moves to Stage 1, Research, in the room of the same name.

The Research Sweep

M02-L1

The Competitor Sweep: 3-5 Rivals

A competitor, or rival, is any product people already use to solve the same problem.

The Research Sweep

M02-L1

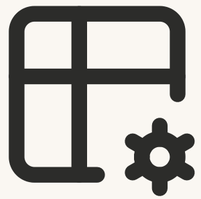

Customer Words, Exactly As Written

This means 10 exact phrases people use for the pain, and 10 for the result they want, copied from reviews and groups word for word.

The Research Sweep

M02-L1

The Gap Matrix Finds Our Edge

With rivals and customer words in hand, we build a gap matrix.

The Research Sweep

M02-L1

Market Size, Trend And Lawful Data

Market size means roughly how many possible customers there are, and the trend means whether that number is growing or shrinking.

The Research Sweep

M02-L1

The Rules Flag Warns The Gate

Then comes the rules flag, short for the regulatory flag.

The Research Sweep

M02-L1

Rank: Market, Profit, Risk, Confidence

Finally, everything is pulled together into an idea code and a rank.

Recap

The Research Sweep

- Check What We Already Own First
- Collect Rivals, Reviews And Customers' Exact Words
- Gap Matrix, Market, Rules Flag, Then Rank

WHY IT MATTERS

Customers' Own Words Beat Our Own Guesses

Quick Check

The Research Sweep

Which reviews does the competitor sweep look at most closely?

A 5 star reviews

B 4 star reviews

C 3 star reviews

D 1 and 2 star reviews

The Merit Gate

M02-L2 · About 6 Minutes

You can explain the four Merit verdicts as a decision tree, say why a person decides and describe the DPIA hold.

The Merit Gate

M02-L2

Ruby Wanted Yes, Got RESHAPE

Ruby is fourteen and had followed Litterline all the way through research.

The Merit Gate

M02-L2

Merit Asks: Is It Worth Building

Merit is the gate between Stage 1, Research, and Stage 2, Base.

The Merit Gate

M02-L2

Why A Person Decides At Merit

Because Merit is the regulatory and data protection kill.

The Merit Gate

M02-L2

Four Verdicts As A Decision Tree

Merit gives one of four verdicts: GO, HOLD, KILL or RESHAPE.

The Merit Gate

M02-L2

RESHAPE Changes, HOLD Waits

RESHAPE means the idea is worth something, but one part must change first.

The Merit Gate

M02-L2

KILL At Merit Goes To Recovery

It burns the id, which means that number is never handed to another idea.

The Merit Gate

M02-L2

The DPIA Hold For High SEN

There is one special hold to know about.

The Merit Gate

M02-L2

GO Must Be Carried And Written

When the verdict is GO, it must be carried.
