Kits And Bricks, Who Sees What, Duties, The Lock Gate

How the first version of an app is scoped, mapped and mocked up, how its duties are listed, and how the Lock gate freezes the feature list.

Choosing Kits And Bricks

M04-L1 · About 6 Minutes

You can describe how the first version of an app is scoped, mapped and mocked up before Lock.

Choosing Kits And Bricks

DO

Sam Wanted Everything In Version One

Sam was helping to plan Stayproof, our sample inspection pack for boarding kennels.

Choosing Kits And Bricks

M04-L1

Stage 3 Picks What Goes In

Stage 3 is where the bricks and kits from Stage 2 become a real feature list.

Choosing Kits And Bricks

M04-L1

Who Sees And Does What

It has one line for each role and each action.

Choosing Kits And Bricks

M04-L1

Every Word And Colour Is Data

Every word, label, colour and category the app shows is listed and stored as rows in a table, never typed into the code.

Choosing Kits And Bricks

M04-L1

Payment Route And Tenancy Level

The third and fourth notes are about money and businesses.

Choosing Kits And Bricks

M04-L1

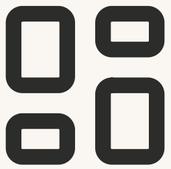

The Launch-Minimum Scope

It is the fewest tables and screens that let a first customer pay and use the app.

Choosing Kits And Bricks

M04-L1

A Clickable Mockup, Phone First

Before anything is built, the app gets a clickable mockup.

Choosing Kits And Bricks

M04-L1

Journeys Are Part Of The Design

One more thing goes into Stage 3: a journey map.

- **Launch-Minimum Means Fewest Screens A Customer Pays For**
- **Clickable Mockup Phone First, Built From The Research**

WHY IT MATTERS

Small And Clear Beats Big And Untested

Quick Check

Choosing Kits And Bricks

What is the launch-minimum scope?

A Every feature a customer could ever want

B The fewest tables and screens that let a first customer pay and use it

C The sales page

D The list of rivals

Duties And The Lock Gate

M04-L2 · About 6 Minutes

You can explain the obligations ledger and what must be true before the Lock gate freezes the feature list.

Duties And The Lock Gate

M04-L2

A List Everyone Liked

Ava and her mum were planning Trimtable, our sample booking desk for dog groomers, with a salon called The Tidy Paw in mind.

Duties And The Lock Gate

M04-L2

Duties Come From A Shared Ledger

A duty, or obligation, is something that must exist or be done before a stage or a paid build can go ahead.

Duties And The Lock Gate

M04-L2

The App Gets Its Own Ledger

At Stage 3 the app gets its own obligations ledger, section 3.7 of its document.

Duties And The Lock Gate

M04-L2

Some Duties Belong To One Person

Some rows can only be done by a person, not an agent.

Duties And The Lock Gate

M04-L2

Open Duties Block The Gate

Here is the rule that gives the ledger its teeth.

Duties And The Lock Gate

M04-L2

Named Payer And A Legal Check

The Lock gate sits between Stage 3 and Stage 4, and it has two firm conditions.

Duties And The Lock Gate

M04-L2

A Person Always Decides At Lock

There is a reason it is always a person.

Duties And The Lock Gate

M04-L2

After Lock, The App Becomes Real

Lock is also the moment the app is created on the build platform, with its own number and a short web name called a slug.
