Test Identities, Test Tenants, The Leak Test Plan

How the last free stage gets an app ready for a paid build: two contrasting test brands, named test members, a test plan with negative cases, a credit estimate and the Invest gate.

Test Identities And Test Tenants

M06-L1 · About 6 Minutes

You can explain why every app needs two contrasting test brands and named test members before any paid build starts.

Test Identities And Test Tenants

M06-L1

01

One Salon Cannot Prove A Wall

He is fourteen, and he was helping to test Trimtable, the booking and client desk for dog groomers.

Test Identities And Test Tenants

M06-L1

Stage 5 Is The Last Free Stage

It happens in the room called Rig, the same room where the tables were built by hand in Stage 4.

Test Identities And Test Tenants

M06-L1

Two Test Tenants, Never Just One

A tenant is one business that uses the app, with its own name and its own data.

Test Identities And Test Tenants

M06-L1

Make The Two Brands Look Different

That word comes straight from the duty list: the second tenant gets different names, different lanes and different colours, so that a…

Test Identities And Test Tenants

M06-L1

Test Rows Must Be Easy To Find

On the build platform, the preview version of the app and the live version share one database.

Test Identities And Test Tenants

M06-L1

Two Test Members For Every Brand

A test identity is a pretend person with a real sign-in, used only for testing.

Test Identities And Test Tenants

M06-L1

No Google Sign-In, No Agent Accounts

First, no Google single sign-on for test members.

Test Identities And Test Tenants

M06-L1

Walk It As A Brand-New Person

One last step comes before any build: the new-account walk.

Recap

Test Identities And Test Tenants

- **Two Contrasting Test Tenants Make A Leak Visible**
- **Two Test Members Per Brand, Each With Own Mailbox**
- **No Google Sign-In, And Agents Never Create Accounts**

WHY IT MATTERS

A Test That Cannot Fail Proves Nothing

Quick Check

Test Identities And Test Tenants

Why does Stage 5 need at least two test tenants?

A Two tenants make the app load faster

B One tenant cannot prove that data stays behind its wall

C The build platform charges less for two tenants

D The sales page needs two brand names

The Leak And Tenant Tests

M06-L2 · About 6 Minutes

You can describe a test plan with negative cases, read a test matrix and explain what the Invest gate decides.

The Leak And Tenant Tests

M06-L2

Her Checklist Only Tested Success

She wrote a checklist to test Stayproof, the inspection pack for boarding kennels, using Hollin Lane Kennels as her example.

The Leak And Tenant Tests

M06-L2

One Row Per Test, With Its Negative

In Stage 5 the factory writes a test plan.

The Leak And Tenant Tests

M06-L2

The Test Matrix: Every Table, Four Visitors

The tests are laid out as a test matrix.

The Leak And Tenant Tests

M06-L2

A Leak Stops The Build

A leak is when someone can see or change data that belongs to somebody else.

The Leak And Tenant Tests

M06-L2

Tests Are Written Before The Prompts

The leak tests are written now, in Stage 5, together with the build prompts, before a single credit is spent.

The Leak And Tenant Tests

M06-L2

The Credit Estimate And The Stop Rule

The factory estimates how many credits the build will take and writes it on the app's card as the word credits, then a number.

00

The Invest Gate (5-6) And Slot Check

Stage 5 ends at the Invest gate, from 5 to 6.

The Leak And Tenant Tests

M06-L2

Ready For The Paid Stage

So when Stage 5 closes, the app has two contrasting test brands, named test members, a test plan with a negative case on every row, and…

Recap

The Leak And Tenant Tests

- **Every Test Row Carries Its Negative Case**
- **Matrix Covers Every Table For Four Kinds Of Visitor**
- **Invest Passes Itself At 1,500 Credits Or Less**

WHY IT MATTERS

Tests Written First Cannot Bend To Fit Results

Quick Check

The Leak And Tenant Tests

What is a negative case?

A. A test that always passes

B. A test of the sales page wording

C. A test that checks something forbidden really fails

D. A test that is only run on a phone
